## DISPOSAL OF FIREPLACE ASHES

**C**old season is upon us and it is very important to dispose of fireplace ashes properly to prevent a fire. Never put fireplace ashes in a trash container because it can easily ignite. Do not remove hot ashes from a fireplace immediately. Wait 2-3 days until they are completely cool and there are no hot embers remaining. If you have to remove the ashes from the fireplace before they are completely cool, put the ashes and remaining hot embers in a metal bucket. Move the bucket outside the house and garage and away from anything that is combustible. Only put fireplace ashes in your trash container when they are completely cool and after you have put your trash container out on the street for trash pickup.
